## **ELECTRIC, Large General Service: Schedule C-2**

<b>Effective date: Nov. 2010</b>
<b>Ordinance Section: 94-113</b>

### **Availability:**

This rate schedule applies to energy supplied for lighting and power purposes to large general service customers. When a customer exceeds fifteen thousand (15,000) kilowatt-hours (kWh) of energy or fifty (50) kilowatts (kW) of demand for three (3) consecutive billing periods, that customer shall be assigned to the large general service electric rate schedule C-2.

### **Character of service:**

Service to be furnished under this schedule shall be single-phase or three-phase, at the option of the system, sixty hertz (60Hz), alternating current (A.C.), at such voltage as may be mutually agreed upon by the system and the customer.

### **Monthly rate** (the sum of the following charges):

Customer charge	\$50.00
Demand charge	\$8.50 / kW
Energy charge	\$0.01892 / kWh
Fuel charge	See Schedule FC
Tax additions	See Schedule X-1

## **ELECTRIC - Large General Service: Schedule C-2**

### **Minimum demand charge:**

A minimum demand charge will be charged by applying the applicable "per kW" demand charge to sixty percent (60%) of the customer's largest billing period demand during any or all of the immediately preceding summer months of June, July, August and September. This minimum demand charge will be applied for the twelve (12) month period immediately following the beginning of the month when the maximum demand was established.

### **Primary service discount (Schedule C-2P):**

A discount of fifty cents (\$0.50) per kW per billing period will be applied to the billing demand charge, when electric service is received directly from the system's primary distribution lines, at the availability and discretion of the system, and if the customer owns and maintains all equipment from the primary metering point to his use location.

Primary service discount customers establishing service on or after January 1, 2002 shall enter into a contractual agreement with the system before receiving the discount. This agreement will provide the terms and conditions under which the discount will be provided, and will specify the standards which the customer must comply with in order to qualify for the discount. Such terms and conditions shall include (1) the specifications for transformers, conductors, connectors, fusing, foundations, terminations, and any other associated material and equipment which the customer must provide to insure continuity of service; (2) the terms for billing the customer for system-provided maintenance services on customer-owned facilities; (3) and other related terms and conditions. The Director will be authorized to negotiate all terms and conditions of the agreement, and to enter into this agreement with the prospective primary service customer.

The Director will also be authorized to enter into agreements with primary service discount customers whose service existed prior to January 1, 2002, to promote the adherence by the customer to LUS standards regarding the specifications for transformers, conductors, connectors, fusing, foundations, terminations, and any other associated material and equipment which the customer must provide to insure continuity of service. Such agreements may promote adherence to such standards, and provide terms for billing the customer for system-provided maintenance services on customer-owned facilities and other related terms and conditions.

### **Power factor adjustment:**

Power factor adjustments will be made when it has been determined that a customer's average monthly power factor is below eighty percent (80%). For such customers, the metered demand kW will be adjusted by dividing it by the actual power factor, and then multiplying the result by 0.80.
